SUBJECT INDEX TO VOLUME 62, 1983

Explanation of symbols:

The page number on which the article appears is listed immediately after the author's name.

Numbers followed by an (*) indicate that the article was a winner in the Annual Hatton Awards Competition.

ABORIGINES

Tooth wear rates among contemporary Australian aborigines. Molnar, S., *et al.* 562

ABSTRACTS

Divisional abstracts. 401

ACADEMIES AND INSTITUTES

Study of productivity and participation at IADR and AADR annual meetings from 1970 to 1981, A. Lee, M.M., *et al.* 578

ACETYLCHOLINE

Quantitative changes in amylase activity in the salivary glands, pancreas, saliva, and serum after administration of isoproterenol, pilocarpine, and acetylcholine. Ikeno, T., *et al.* 56

ACID-ETCHING

Dentin permeability: effects of temperature on hydraulic conductance. Pashley, D.H., *et al.* 956

Effect of acid-etching on caries-like lesions treated with stannous fluoride, The. Hicks, M.J., *et al.* 783

Effect of mastication on marginal adaptation of composite restorations *in vivo*, The. Qvist, V. 904

In vitro caries-like lesion formation in F-containing tooth enamel. LeGeros, R.Z., *et al.* 138

ACIDS

Acid pattern in human dental plaque, The. Distler, W., *et al.* 87

Cement-forming properties of phytic acid, The. Prosser, H.J., *et al.* 598

Effect of continuous fluoride gel use on plaque fluoride retention and microbial activity. Brown, L.R., *et al.* 746

Effect of non-steroidal anti-inflammatory drugs on the metabolism of ^{14}C-arachidonic acid by human gingival tissue, The. ElAttar, T.M.A., *et al.* 975

Nuclear magnetic resonance spectroscopic studies of the interaction of phospholipids with stabilizing lysosome agents. Fujisawa, S., *et al.* 803

ACINETOBACTER

Acinetobacter contamination of laboratory dental pumice. Williams, H.N., *et al.* 1073

ACRYLIC RESINS

Extent of polymerization of dental resins by differential scanning calorimetry. Antonucci, J.M., *et al.* 121

Level of residual monomer in self-curing denture base materials, The. Fletcher, A.M., *et al.* 118

Mechanism of adhesion of polyelectrolyte cements to hydroxyapatite. Wilson, A.D., *et al.* 590

Water absorption and water solubility of soft lining materials for acrylic dentures. Braden, M., *et al.* 764

ACTINOMYCES

Comparison of antimicrobial activity of four disclosant dyes, A. Baab, D.A., *et al.* 837

Effect of xylitol on the growth and glycolysis of acidogenic oral bacteria. Vadeboncoeur, C., *et al.* 882

Neuraminidase-activated attachment of *actinomyces naeslundii* ATCC 12104 to human buccal epithelial cells. Saunders, J.M., *et al.* 1038

Oral colonization and pathogenicity of *actinomyces israelii* in gnotobiotic rats. Behbehani, M.J., *et al.* 69

Sodium fluoride susceptibilities of suspected periodontopathic bacteria. Mandell, R.L. 706

Use of bacteriophage-resistant mutants to study *actinomyces viscosus* cell surface receptors. Tylenda, C.A., *et al.* 1179*

ACTINOMYCOSIS

Oral colonization and pathogenicity of *actinomyces israelii* in gnotobiotic rats. Behbehani, M.J., *et al.* 69

ADENOSINE CYCLIC MONOPHOSPHATE

Dispersed rat parotid cells: role of calcium and cAMP in the regulation of amylase secretion. Quissell, D.O., *et al.* 131

Role of cyclic AMP, calcium, and prostaglandins in the induction of osteoclastic bone resorption associated with experimental tooth movement, The. Yamasaki, K. 877

ADENOSINE TRIPHOSPHATE

Acid pattern in human dental plaque, The. Distler, W., *et al.* 87

AGING

Aging and oral motor function: evidence for altered performance among older persons. Baum, B.J., *et al.* 2

ALDEHYDES

Action of drugs on liposomes with varying charges. Fujisawa, S., *et al.* 65

ALUMINUM

Aluminum foil pouch packaging in pre-measured amalgam capsules. Rinne, V.W. 116

ALVEOLAR BONE

Role of cyclic AMP, calcium, and prostaglandins in the induction of osteoclastic bone resorption associated with experimental tooth movement, The. Yamasaki, K. 877

ALVEOLAR RIDGE AUGMENTATION

Experimental ridge augmentation with porous hydroxyapatite implants. Piecuch, J.F., *et al.* 148

AMELOGENESIS

Carbonic anhydrase in developing hamster molars. Dogterom, A.A., *et al.* 789

Effects of parathyroid hormone, calcitonin, and vitamin D metabolites on calcium transport in the secretory rat enamel organ, The. Bawden, J.W., *et al.* 952

Molecular composition of the protein matrix of developing human dental enamel. Fincham, A.G., *et al.* 11

Target cells for 1,25-dihydroxyvitamin D_3 in developing rat incisor teeth. Kim, Y.S., *et al.* 58

AMINES

Action of drugs on liposomes with varying charges. Fujisawa, S., *et al.* 65

AMYLASES

Dispersed rat parotid cells: role of calcium and cAMP in the regulation of amylase secretion. Quissell, D.O., *et al.* 131

Quantitative changes in amylase activity in the salivary glands, pancreas, saliva, and serum after administration of isoproterenol, pilocarpine, and acetylcholine. Ikeno, T., *et al.* 56

ANALYSIS OF VARIANCE

Autonomic responses to dental procedures in pedodontic patients during a standard restoration session. West, G.A., *et al.* 728

Comparison of *in vitro* and *in vivo* wear of composites. Powers, J.M., *et al.* 10

Estimates of the gain in power utilizing transformations of DMFS scores. Smith, M.R., *et al.* 992

Intraclass correlation and the application of analysis of variance to dental data. Cohen, M.E., *et al.* 322

Measurement of resistance of amalgam mixes to condensation. Ogura, H., *et al.* 930

Rat caries assay of reference foods and sugar-containing snacks. Navia, J.M., *et al.* 893

ANDROGENS

Effects of androgens on the activity of steroid-metabolizing enzymes in the murine submaxillary gland. Katsukawa, H., *et al.* 725

ANTISEPSIS

Mechanism of action of an antiseptic, anti-odor mouthwash. Pitts, G., *et al.* 738

ANXIETY

Autonomic responses to dental procedures in pedodontic patients during a standard restoration session. West, G.A., *et al.* 728

APATITES

Acid reactivity of carbonated apatites with strontium and fluoride substitutions. Featherstone, J.D.B., *et al.* 1049

Composition of recrystallized bone mineral, The. Biltz, R.M., *et al.* 1190

Mechanism of adhesion of polyelectrolyte cements to hydroxyapatite. Wilson, A.D., *et al.* 590

Solubility of octacalcium phosphate at 37 °C in the system $Ca(OH)_2 - H_3PO_4 - KNO_3 - H_2O$. Shyu, L.J., *et al.* 398

ATTRITION, DENTAL

Tooth wear rates among contemporary Australian aborigines. Molnar, S., *et al.* 562

BABOONS

Acute tissue irritations of polysulfide rubber impression materials. Spranley, T.J., *et al.* 548

BACTERIA

Comparison of antimicrobial activity of four disclosant dyes, A. Baab, D.A., *et al.* 837

Effect of continuous fluoride gel use on plaque fluoride retention and microbial activity. Brown, L.R., *et al.* 746

Mechanism of action of an antiseptic, anti-odor mouthwash. Pitts, G., *et al.* 738

Production of histolytic enzymes by a combination of oral bacteria with known pathogenicity. Dahlén, G., *et al.* 1041

Sodium fluoride susceptibilities of suspected periodontopathic bacteria. Mandell, R.L. 706

BACTERIOPHAGES

Use of bacteriophage-resistant mutants to study *actinomyces viscosus* cell surface receptors. Tylenda, C.A., *et al.* 1179*

BIOCOMPATIBLE MATERIALS

Statistical analysis of the clinical response to the single-crystal sapphire endosseous dental implant in dog jaws, A. Steflik, D.E., *et al.* 1212

BLOOD FLOW

Blood flow changes in the rabbit maxilla following an anterior osteotomy. Indresano, A.T., *et al.* 743

Effect of eugenol on constrictor responses in blood vessels of the rabbit ear. Hume, W.R. 1013

Effect of indomethacin on the blood flow of the rabbit submandibular gland. Fazekas, Á., *et al.* 537

BONDING, DENTAL

Bovine teeth as possible substitutes in the adhesion test. Nakamichi, I., *et al.* 1076

Development of high-strength, acrylic resin-compatible adhesive cements. Brauer, G.M., *et al.* 366

Effect of acid-etching on caries-like lesions treated with stannous fluoride, The. Hicks, M.J., *et al.* 783

Effect of cement base thickness on MOD amalgam restorations. Farah, J.W., *et al.* 109

Effects of porcelain/alloy interfacial diffusion zones on thermo-mechanical strain. Tesk, J.A., *et al.* 585

Enhancement of *streptococcus mutans* colonization by direct bonded orthodontic appliances. Mattingly, J.A., *et al.* 1209

Influence of various admixes on the physical properties of a polycarboxylate cement. Øilo, G., *et al.* 937

Mechanism of adhesion of polyelectrolyte cements to hydroxyapatite. Wilson, A.D., *et al.* 590

Oxidation kinetics of some Ni-Cr alloys. Baran, G. 51

Rate of setting of zinc polycarboxylate dental cements investigated by an electric conductance method, The. Wiegman-Ho, L., *et al.* 105

Stress analysis of a tooth restored with a post and core. Peters, M.C.R.B., *et al.* 760

Structure of high-temperature oxidation zones of gold alloys for metal-porcelain bonding containing small amounts of In and Sn. Ohno, H., *et al.* 774

X-ray spectrometric technique for measuring porcelain-metal adherence, An. Ringle, R.D., *et al.* 933

BONE AND BONES

Simplified technique for the evaluation of circulation in experimental osseous grafts, A. Petri, W.H., *et al.* 752

BONE RESORPTION

Effect of dichloromethylene diphosphonate on fluoride balance in healthy men. Maheshwari, U.R., *et al.* 559

Role of cyclic AMP, calcium, and prostaglandins in the induction of osteoclastic bone resorption associated with experimental tooth movement, The. Yamasaki, K. 877

CALCITONIN

Effects of parathyroid hormone, calcitonin, and vitamin D metabolites on calcium transport in the secretory rat enamel organ, The. Bawden, J.W., *et al.* 952

CALCIUM

Dispersed rat parotid cells: role of calcium and cAMP in the regulation of amylase secretion. Quissell, D.O., *et al.* 131

CALCIUM OXALATE

Weddellite in submandibular gland calculus. Yamamoto, H., *et al.* 16

CALCIUM PHOSPHATES

Microbeam x-ray diffraction analysis of dental calculus. Kani, T., *et al.* 92

Solubility of octacalcium phosphate at 37 °C in the system $Ca(OH)_2 - H_3PO_4 - KNO_3 - H_2O$. Shyu, L.J., *et al.* 398

CAPNOCYTOPHAGA OCHRACEA

Modulation of *in vitro* human lymphocyte responses by an exopolysaccharide from *capnocytophaga ochracea*. Bolton, R.W., *et al.* 1186

CALORIMETRY

Extent of polymerization of dental resins by differential scanning calorimetry. Antonucci, J.M., *et al.* 121

CARBOHYDRATE METABOLISM

Effect of pH upon sucrose and glucose catabolism by the various genogroups of *streptococcus mutans*. Harper, D.S., *et al.* 526

CARBONATES

Acid reactivity of carbonated apatites with strontium and fluoride substitutions. Featherstone, J.D.B., *et al.* 1049

CARBONIC ANHYDRASE

Carbonic anhydrase in developing hamster molars. Dogterom, A.A., *et al.* 789

CARBOXYLIC ACIDS

Action of drugs on liposomes with varying charges. Fujisawa, S., *et al.* 65

CARIOGENIC AGENTS

Acidogenic potential of reference foods and snacks at interproximal sites in the human dentition, The. Jensen, M.E., *et al.* 889

Enamel demineralization tests with some standard foods and candies. Bibby, B.G., *et al.* 885

Rat caries assay of reference foods and sugar-containing snacks. Navia, J.M., *et al.* 893

CARIOSTATIC AGENTS

Dental caries and strontium concentration in drinking water and surface enamel. Athanassouli, T.M., *et al.* 989

Fluoride uptake and retention *in vitro* following topical fluoride applications. Wei, S.H.Y., *et al.* 830

Fluoride uptake by artificial caries lesions from fluoride dentifrices *in vivo*. Mellberg, J.R., *et al.* 540

In vitro caries-like lesion formation in F-containing tooth enamel. LeGeros, R.Z., *et al.* 138

Increases in fluoride, calcium, and phosphate in dental plaque resulting from the use of a mineralizing mouthrinse containing urea and monofluorophosphate. Pearce, E.I.F., *et al.* 818

Morphology of enamel surfaces treated with topical fluoride agents: SEM considerations. Nelson, D.G.A., *et al.* 1201

Prevention of dental caries in hamsters by an endo-1,3-D-glucanase. Simonson, L.G., *et al.* 395

CATHEPSINS

Identification of a cathepsin B-like protease in the crevicular fluid of gingivitis patients. Eisenhauer, D.A., *et al.* 917

CELL MEMBRANE

Acid sensitivity of glycolysis in normal and proton-permeable cells of *streptococcus mutans* GS-5. Thibodeau, E.A., *et al.* 1174*

CELL MOVEMENT

Grooved titanium surfaces orient growth and migration of cells from human gingival explants. Brunette, D.M., *et al.* 1045

CERAMICS

Development of a novel tooth-root implant material, The. El Basty, M.A., *et al.* 73
Experimental ridge augmentation with porous hydroxyapatite implants. Piecuch, J.F., *et al.* 148
Three-dimensional stress distribution around a dental implant at different stages of interface development. Borchers, L., *et al.* 155

CHEEK

Extensibility characteristics of the human cheek: a pilot study. Weinstein, S., *et al.* 344

CHEMOTAXIS

Juvenile periodontitis as a model for neutrophil function: reduced binding of the complement chemotactic fragment, C5a. Van Dyke, T.E., *et al.* 870

CHOLINESTERASES

Pseudocholinesterase activity and its origin in human oral fluid. Ryhänen, R. *et al.* 20

CHROMOTOGRAPHY

Acid pattern in human dental plaque, The. Distler, W., *et al.* 87
Level of residual monomer in self-curing denture base materials, The. Fletcher, A.M., *et al.* 118

CLINICAL TRIALS

Comparison of *in vitro* and *in vivo* wear of composites. Powers, J.M., *et al.* 1089
Development of an artificial oral environment for the testing of dental restoratives: bi-axial force and movement control. DeLong, R., *et al.* 32
Estimates of the gain in power utilizing transformations of DMFS scores. Smith, M.R., *et al.* 992
Intraclass correlation and the application of analysis of variance to dental data. Cohen, M.E., *et al.* 322
Role of oral kinesthesia in the determination of the swallowing threshold, The. Takahashi, T., *et al.* 327
Statistical analysis of the clinical response to the single-crystal sapphire endosseous dental implant in dog jaws, A. Steflik, D.E., *et al.* 1212

COLCHICINE

Nuclear magnetic resonance spectroscopic studies of the interaction of phospholipids with stabilizing lysosome agents. Fujisawa, S., *et al.* 803

COLLAGEN

Collagenase activity in human saliva. Iijima, K., *et al.* 709
Mechanism of differential staining in carious dentin. Kuboki, Y., *et al.* 713

COLOR

Prediction of color of an esthetic restorative material. Miyagawa, Y., *et al.* 581

COMPOSITE RESINS

Bovine teeth as possible substitutes in the adhesion test. Nakamichi, I., *et al.* 1076
Comparison of *in vitro* and *in vivo* wear of composites. Powers, J.M., *et al.* 1089
Comparison of the *in vitro* cytotoxicity of two glass-ionomer cements, A. Meryon, S.D., *et al.* 769
Development of a novel tooth-root implant material, The. El Basty, M.A., *et al.* 733
Effect of mastication on marginal adaptation of composite restorations *in vivo*, The. Qvist, V. 904
Effects of composite restorations on the periodontal membrane in monkeys. Nasjleti, C.E., *et al.* 75
In vitro effect of APF gel on three composite resins. Kula, K., *et al.* 846
Initial dimensional change of composites in dry and wet conditions. Hirasawa, T., *et al.* 28
Leaking of fillers in dental composites. Söderholm, K.-J. M. 126
Post-irradiation polymerization of visible light-activated composite resin. Leung, R.L., *et al.* 363
Prediction of color of an esthetic restorative material. Miyagawa, Y., *et al.* 581
Relationship between filler loading and particle size distribution in composite resin technology, The. Cross, M., *et al.* 850

CROSS-LINKING REAGENTS

Biochemical study of two bifunctional reagents as alternatives to formocresol, A. Ranly, D.M., *et al.* 1054

CYSTIC FIBROSIS

Increased salivary buffering in association with a low caries experience in children suffering from cystic fibrosis. Kinirons, M.J. 815

CYTOTOXICITY

Biologic evaluation of a silver-copper-germanium dental casting alloy and a gold-germanium coating alloy. Townsend, J.D., *et al.* 899

CYTOMEGALOVIRUS

Virus-associated submandibular gland duct cell cytomegaly in a European hedgehog, *erinaceus europaeus* L. MacCallum, D.K., *et al.* 377

CYTOSINE

Relationships among the oral fusobacteria assessed by DNA-DNA hybridization. Potts, T.V., *et al.* 702

DEGLUTITION

Aging and oral motor function: evidence for altered performance among older persons. Baum, B.J., *et al.* 2
Role of oral kinesthesia in the determination of the swallowing threshold, The. Takahashi, T., *et al.* 327

DENTAL ALLOYS

Aluminum foil pouch packaging in pre-measured amalgam capsules. Rinne, V.W. 116
Analysis of thermally-induced stresses in porcelain-metal systems. DeHoff, P.H., *et al.* 593
Biologic evaluation of a silver-copper-germanium dental casting alloy and a gold-germanium coating alloy. Townsend, J.D., *et al.* 899
Changes in the microstructures of silver-tin and admixed high-copper amalgams during creep. Okabe, T., *et al.* 37
Effect of tensile strain on corrosion of dental amalgam, The. Averette, D.F., *et al.* 842
Effects of fatigue on a soldered base metal alloy. Hawbolt, E.B., *et al.* 1221
Effects of porcelain/alloy interfacial diffusion zones on thermo-mechanical strain. Tesk, J.A., *et al.* 585
High-temperature behavior of a Pd-Ag alloy for porcelain. Mackert, J.R., Jr., *et al.* 1224
Influence of drawing parameters on the mechanical properties of two beta-titanium alloys, The. Shastry, C.V., *et al.* 1092
Measurement of resistance of amalgam mixes to condensation. Ogura, H., *et al.* 930
On creep mechanisms in amalgams. Herø, H. 44
Oxidation kinetics of some Ni-Cr alloys. Baran, G. 51
Polarization-corrosion behavior of commercial gold and silver base casting alloys in fusayama solution. Johnson, D.L., *et al.* 1216
Structure of high-temperature oxidation zones of gold alloys for metal-porcelain bonding containing small amounts of In and Sn. Ohno, H., *et al.* 774
Tarnishing of a low-gold dental alloy in different structural states. Herø, H., *et al.* 371
Thermal shock resistance of porcelain discs. Anusavice, K.J., *et al.* 1082
X-ray spectrometric technique for measuring porcelain-metal adherence, An. Ringle, R.D., *et al.* 933

DENTAL AMALGAM

Aluminum foil pouch packaging in pre-measured amalgam capsules. Rinne, V.W. 116
Biomechanical stress analysis of the amalgam-tooth interface. Peters, M.C.R.B., *et al.* 358
Changes in the microstructures of silver-tin and admixed high-copper amalgams during creep. Okabe, T., *et al.* 37

Effect of cement base thickness on MOD amalgam restorations. Farah, J.W., *et al.* 109
Effect of tensile strain on corrosion of dental amalgam, The. Averette, D.F., *et al.* 842
Effects of composite restorations on the periodontal membrane in monkeys. Nasjleti, C.E., *et al.* 75
Measurement of resistance of amalgam mixes to condensation. Ogura, H., *et al.* 930
Microstructures of Cu-rich amalgams after corrosion. Lin, J.-H. C., *et al.* 112
On creep mechanisms in amalgams. Herø, H. 44
Simulation model for quantitation of microleakage *in vitro*, A. Shen, C., *et al.* 353

DENTAL ARCH

Extensibility characteristics of the human cheek: a pilot study. Weinstein, S., *et al.* 344

DENTAL CALCULUS

Microbeam x-ray diffraction analysis of dental calculus. Kani, T., *et al.* 92
Quantitation of human salivary acidic proline-rich proteins in oral diseases. Mandel, I.D., *et al.* 943

DENTAL CARE

Autonomic responses to dental procedures in pedodontic patients during a standard restoration session. West, G.A., *et al.* 728

DENTAL CARIES

Acid pattern in human dental plaque, The. Distler, W., *et al.* 87
Acid sensitivity of glycolysis in normal and proton-permeable cells of *streptococcus mutans* GS-5. Thibodeau, E.A., *et al.* 1174*
Acidogenic potential of reference foods and snacks at interproximal sites in the human dentition, The. Jensen, M.E., *et al.* 889
Caries through the ages: a worm's eye view. Mandel, I.D. 926
Changes in protein composition of saliva from radiation-induced xerostomia patients and its effect on growth of oral streptococci. Cowman, R.A., *et al.* 336
Characterization and modification of electrochemical properties of teeth. Tung, M.S., *et al.* 60
Combined effect of trace elements and fluoride on caries: changes over ten years in northwest Ohio (U.S.A.). Curzon, M.E.J. 96
Dental caries and strontium concentration in drinking water and surface enamel. Athanassouli, T.M., *et al.* 989
Detection of antigens in enzymic lysates of cell wall from *streptococcus mutans* strains. Knox, K.W., *et al.* 1033
Effect of acid-etching on caries-like lesions treated with stannous fluoride, The. Hicks, M.J., *et al.* 783
Effect of continuous fluoride gel use on plaque fluoride retention and microbial activity. Brown, L.R., *et al.* 746
Effect of mastication on marginal adaptation of composite restorations *in vivo*, The. Qvist, V. 904
Effect of zinc citrate on fluoride uptake by artificial caries lesions. Mellberg, J.R., *et al.* 145
Enamel demineralization tests with some standard foods and candies. Bibby, B.G., *et al.* 885
Extent of the odontoblast process in normal and carious human dentin. Yamada, T., *et al.* 798
Fluoride uptake and retention *in vitro* following topical fluoride applications. Wei, S.H.Y., *et al.* 830
Fluoride uptake by artificial caries lesions from fluoride dentifrices *in vivo*. Mellberg, J.R., *et al.* 540
Increased salivary buffering in association with a low caries experience in children suffering from cystic fibrosis. Kinirons, M.J. 815
In vitro caries-like lesion formation in F-containing tooth enamel. LeGeros, R.Z., *et al.* 138
In vitro effect of APF gel on three composite resins. Kula, K., *et al.* 846
Mechanism of differential staining in carious dentin. Kuboki, Y., *et al.* 713
Microbiologic effects of SnF_2 and NaF mouthrinses in subjects with high caries activity: results after one year. Tinanoff, N., *et al.* 907
Microradiographic and chemical comparison of *in vitro* systems for the simulation of incipient caries in abraded bovine enamel, A. Pearce, E.I.F. 969
Morphology of enamel surfaces treated with topical fluoride agents: SEM considerations. Nelson, D.G.A., *et al.* 1201
Prevention of dental caries in hamsters by an endo-1,3-D-glucanase. Simonson, L.G., *et al.* 395
Rat caries assay of reference foods and sugar-containing snacks. Navia, J.M., *et al.* 893
Taste thresholds, taste preferences, and dental caries in 15-year-olds. Nilsson, B., *et al.* 1069
Ultrastructure and hardness of the transparent layer of human carious dentin, The. Ogawa, K., *et al.* 7

DENTAL CARIES SUSCEPTIBILITY

Combined effect of trace elements and fluoride on caries: changes over ten years in northwest Ohio (U.S.A.). Curzon, M.E.J. 96
Comparative growth responses of oral streptococci on mixed saliva or the separate submandibular and parotid secretions from caries-active and caries-free individuals. Cowman, R.A., *et al.* 946
Comparative study of salivary lysozyme in caries-resistant and caries-susceptible adults, A. Stuchell, R.N., *et al.* 552
Effect of pH upon sucrose and glucose catabolism by the various genogroups of *streptococcus mutans*. Harper, D.S., *et al.* 526
Effect of xylitol on the growth and glycolysis of acidogenic oral bacteria. Vadeboncoeur, C., *et al.* 882
Quantitation of human salivary acidic proline-rich proteins in oral diseases. Mandel, I.D., *et al.* 943
Salivary lactoperoxidase system in caries-resistant and -susceptible adults, The. Mandel, I.D., *et al.* 922
Sodium fluoride susceptibilities of suspected periodontopathic bacteria. Mandell, R.L. 706
Synergistic inhibitory effect of zinc and hexetidine on *in vitro* growth and acid production of *streptococcus mutans*. Moermann, J.E., *et al.* 135

DENTAL CASTING TECHNIC

Biologic evaluation of a silver-copper-germanium dental casting alloy and a gold-germanium coating alloy. Townsend, J.D., *et al.* 899
X-ray spectrometric technique for measuring porcelain-metal adherence, An. Ringle, R.D., *et al.* 933

DENTAL CEMENTS

Bovine teeth as possible substitutes in the adhesion test. Nakamichi, I., *et al.* 1076
Cement-forming properties of phytic acid, The. Prosser, H.J., *et al.* 598
Comparison of the *in vitro* cytotoxicity of two glass-ionomer cements, A. Meryon, S.D., *et al.* 769
Degradation of luting cements measured *in vitro* and *in vivo*. Mesu, F.P., *et al.* 1231
Development of high-strength, acrylic resin-compatible adhesive cements. Brauer, G.M., *et al.* 366
Effect of cement base thickness on MOD amalgam restorations. Farah, J.W., *et al.* 109
Influence of various admixes on the physical properties of a polycarboxylate cement. Øilo, G., *et al.* 937
Mechanism of adhesion of polyelectrolyte cements to hydroxyapatite. Wilson, A.D., *et al.* 590
Rate of setting of zinc polycarboxylate dental cements investigated by an electric conductance method, The. Wiegman-Ho, L., *et al.* 105
Simulation model for transient thermal analysis of restored teeth, A. de Vree, J.H.P., *et al.* 756
Stress analysis of a tooth restored with a post and core. Peters, M.C.R.B., *et al.* 760

DENTAL CEMENTUM

Shallow fluorine depth profiles of cementum in periodontal disease—a pilot study. Crawford, A.W., *et al.* 806
Validity of clinical assessments related to the cemento-enamel junction. Hug, H.U. 825

DENTAL ENAMEL

Acid reactivity of carbonated apatites with strontium and fluoride substitutions. Featherstone, J.D.B., *et al.* 1049
Acidogenic potential of reference foods and snacks at interproximal sites in the human dentition, The. Jensen, M.E., *et al.* 889
Characterization and modification of electrochemical properties of teeth. Tung, M.S., *et al.* 60
Concentration changes in surface Ca, P, F, Zn, Fe, and Sr during white spot formation. Crawford, A.W., *et al.* 964
Dental caries and strontium concentration in drinking water and surface enamel. Athanassouli, T.M., *et al.* 989
Effect of acid-etching on caries-like lesions treated with stannous fluoride, The. Hicks, M.J., *et al.* 783
Effect of enamel de- and remineralization on

permeability to iodide and urea, The. Amdur, B.H., *et al.* 1067
Effect of mandibular molar anatomy on the buccal class I cavity preparation. Re, G.J., *et al.* 997
Effect of mastication on marginal adaptation of composite restorations *in vivo*, The. Qvist, V. 904
Effects of parathyroid hormone, calcitonin, and vitamin D metabolites on calcium transport in the secretory rat enamel organ, The. Bawden, J.W., *et al.* 952
Enamel demineralization tests with some standard foods and candies. Bibby, B.G., *et al.* 885
Enhancement of *streptococcus mutans* colonization by direct bonded orthodontic appliances. Mattingly, J.A., *et al.* 1209
Fluoride uptake and retention *in vitro* following topical fluoride applications. Wei, S.H.Y., *et al.* 830
Fluoride uptake by artificial caries lesions from fluoride dentifrices *in vivo*. Mellberg, J.R., *et al.* 540
In vitro caries-like lesion formation in F-containing tooth enamel. LeGeros, R.Z., *et al.* 138
Localization of serum albumin in dentin and enamel. Okamura, K. 100
Microradiographic and chemical comparison of *in vitro* systems for the simulation of incipient caries in abraded bovine enamel, A. Pearce, E.I.F. 969
Molecular composition of the protein matrix of developing human dental enamel. Fincham, A.G., *et al.* 11
Morphology of enamel surfaces treated with topical fluoride agents: SEM considerations. Nelson, D.G.A., *et al.* 1201
Validity of clinical assessments related to the cemento-enamel junction. Hug, H.U. 825

DENTAL ENAMEL PROTEINS

Molecular composition of the protein matrix of developing human dental enamel. Fincham, A.G., *et al.* 11

DENTAL FILLING MATERIALS

Leaking of fillers in dental composites. Soderholm, K.-J. M. 126

DENTAL IMPLANTATION

Development of a novel tooth-root implant material, The. El Basty, M.A., *et al.* 73
Experimental ridge augmentation with porous hydroxyapatite implants. Piecuch, J.F., *et al.* 148
Grooved titanium surfaces orient growth and migration of cells from human gingival explants. Brunette, D.M., *et al.* 1045
Statistical analysis of the clinical response to the single-crystal sapphire endosseous dental implant in dog jaws, A. Steflik, D.E., *et al.* 1212
Three-dimensional stress distribution around a dental implant at different stages of interface development. Borchers, L., *et al.* 155

DENTAL IMPRESSION MATERIALS

Acute tissue irritations of polysulfide rubber impression materials. Spranley, T.J., *et al.* 548

DENTAL INSTRUMENTS

Validity of clinical assessments related to the cemento-enamel junction. Hug, H.U. 825

DENTAL OCCLUSION

Measurement of the ability to control jaw musle forces in man. Lewis, G.R., *et al.* 821
Occlusal forces in normal- and long-face adults. Proffit, W.R., *et al.* 566
Occlusal forces in normal- and long-face children. Proffit, W.R., *et al.* 571

DENTAL PLAQUE

Acid pattern in human dental plaque, The. Distler, W., *et al.* 87
Acid sensitivity of glycolysis in normal and proton-permeable cells of *streptococcus mutans* GS-5. Thibodeau, E.A., *et al.* 1174*
Acidogenic potential of reference foods and snacks at interproximal sites in the human dentition, The. Jensen, M.E., *et al.* 889
Caries through the ages: a worm's eye view. Mandel, I.D. 926
Comparison of antimicrobial activity of four disclosant dyes, A. Baab, D.A., *et al.* 837
Detection of antigens in enzymic lysates of cell wall from *streptococcus mutans* strains. Knox, K.W., *et al.* 1033
Effect of continuous fluoride gel use on plaque fluoride retention and microbial activity. Brown, L.R., *et al.* 746
Effect of xylitol on the growth and glycolysis of acidogenic oral bacteria. Vadeboncoeur, C., *et al.* 882
Effect of zinc citrate on fluoride uptake by artificial caries lesions. Mellberg, J.R., *et al.* 145
Enamel demineralization tests with some standard foods and candies. Bibby, B.G., *et al.* 885
Enhancement of *streptococcus mutans* colonization by direct bonded orthodontic appliances. Mattingly, J.A., *et al.* 1209
Fusobacterium periodonticum, a new species from the human oral cavity. Slots, J., *et al.* 960
Increases in fluoride, calcium, and phosphate in dental plaque resulting from the use of a mineralizing mouthrinse containing urea and monofluorophosphate. Pearce, E.I.F., *et al.* 818
Plaque pH measurements by different methods on the buccal and approximal surfaces of human teeth after a sucrose rinse. Jensen, M.E., *et al.* 1058
Purification and some properties of neuraminidase isolated from the culture medium of oral bacterium *streptococcus mitis* ATCC 9811. Nonaka, H., *et al.* 792
Salivary lactoperoxidase system in caries-resistant and -susceptible adults, The. Mandel, I.D., *et al.* 922
Synergistic inhibitory effect of zinc and hexetidine on *in vitro* growth and acid production of *streptococcus mutans*. Moermann, J.E., *et al.* 135
Use of bacteriophage-resistant mutants to study *actinomyces viscosus* cell surface receptors. Tylenda, C.A., *et al.* 1179*

DENTAL PORCELAINS

Analysis of thermally-induced stresses in porcelain-metal systems. DeHoff, P.H., *et al.* 593
Effects of porcelain/alloy interfacial diffusion zones on thermo-mechanical strain. Tesk, J.A., *et al.* 585
High-temperature behavior of a Pd-Ag alloy for porcelain. Mackert, J.R., Jr., *et al.* 1224
In vitro effect of APF gel on three composite resins. Kula, K., *et al.* 846
Oxidation kinetics of some Ni-Cr alloys. Baran, G. 51
Prediction of color of an esthetic restorative material. Miyagawa, Y., *et al.* 581
Structure of high-temperature oxidation zones of gold alloys for metal-porcelain bonding containing small amounts of In and Sn. Ohno, H., *et al.* 774
Thermal shock resistance of porcelain discs. Anusavice, K.J., *et al.* 1082
Three-point beam test for the evaluation of dental porcelain, The. Edwards, M.R., *et al.* 1086
X-ray spectrometric technique for measuring porcelain-metal adherence, An. Ringle, R.D., *et al.* 933

DENTAL PROSTHESIS

Acinetobacter contamination of laboratory dental pumice. Williams, H.N., *et al.* 1073

DENTAL PULP

Blood flow changes in the rabbit maxilla following an anterior osteotomy. Indresano, A.T., *et al.* 743
Fluoride concentration in rat and human tooth pulps and their possible interference with phosphatase activities. Ericsson, Y., *et al.* 1196

DENTAL STRESS ANALYSIS

Analysis of thermally-induced stresses in porcelain-metal systems. DeHoff, P.H., *et al.* 593
Biomechanical stress analysis of the amalgam-tooth interface. Peters, M.C.R.B., *et al.* 358
Dentin stresses in post-reconstructed teeth with diminishing bone support. Reinhardt, R.A., *et al.* 1002
Effect of tensile strain on corrosion of dental amalgam, The. Averette, D.F., *et al.* 842
Effects of fatigue on a soldered base metal alloy. Hawbolt, E.B., *et al.* 1221
Effects of porcelain/alloy interfacial diffusion zones on thermo-mechanical strain. Tesk, J.A., *et al.* 585
Simulation model for quantitation of microleakage *in vitro*, A. Shen, C., *et al.* 353
Stress analysis of a tooth restored with a post and core. Peters, M.C.R.B., *et al.* 760
Stress analysis of the human tooth using a three-dimensional finite element model. Rubin, C., *et al.* 82
Thermal shock resistance of porcelain discs. Anusavice, K.J., *et al.* 1082
Three-dimensional stress distribution around a dental implant at different stages of interface development. Borchers, L., *et al.* 155

DENTIFRICES

Effect of zinc citrate on fluoride uptake by artificial caries lesions. Mellberg, J.R., *et al.* 145
Fluoride uptake by artificial caries lesions from fluoride dentifrices *in vivo*. Mellberg, J.R., *et al.* 540
Increases in fluoride, calcium, and phosphate in dental plaque resulting from the use of a mineralizing mouthrinse containing urea and monofluorophosphate. Pearce, E.I.F., *et al.* 818

DENTIN

Bovine teeth as possible substitutes in the adhesion test. Nakamichi, I., *et al.* 1076
Dentin stresses in post-reconstructed teeth with diminishing bone support. Reinhardt, R.A., *et al.* 1002
Effect of mandibular molar anatomy on the buccal class I cavity preparation. Re, G.J., *et al.* 997
Extent of the odontoblast process in normal and carious human dentin. Yamada, T., *et al.* 798
Localization of serum albumin in dentin and enamel. Okamura, K. 100
Mechanism of differential staining in carious dentin. Kuboki, Y., *et al.* 713
Ultrastructure and hardness of the transparent layer of human carious dentin, The. Ogawa, K., *et al.* 7
Ultrastructure of dentinal tubules from erupted human premolar teeth, The. Thomas, H.F., *et al.* 532

DENTIN PERMEABILITY

Dentin permeability: effects of temperature on hydraulic conductance. Pashley, D.H., *et al.* 956

DENTINOGENESIS

Extent of the odontoblast process in normal and carious human dentin. Yamada, T., *et al.* 798

DENTITION

Development of a novel tooth-root implant material, The. El Basty, M.A., *et al.* 733
Extensibility characteristics of the human cheek: a pilot study. Weinstein, S., *et al.* 344

DENTURE BASES

Level of residual monomer in self-curing denture base materials, The. Fletcher, A.M., *et al.* 118
Water absorption and water solubility of soft lining materials for acrylic dentures. Braden, M., *et al.* 764

DENTURE, PARTIAL

Effect of single plane curvature on half-round cast clasps. The. Johnson, D.L., *et al.* 833

DENTURE LINERS

Water absorption and water solubility of soft lining materials for acrylic dentures. Braden, M., *et al.* 764

DENTURE RETENTION

Effect of single plane curvature on half-round cast clasps, The. Johnson, D.L., *et al.* 833
Water absorption and water solubility of soft lining materials for acrylic dentures. Braden, M., *et al.* 764

DENTURES

Experimental ridge augmentation with porous hydroxyapatite implants. Piecuch, J.F., *et al.* 148

DICHLOROMETHYLENE DIPHOSPHONATE

Effect of dichloromethylene diphosphonate on fluoride balance in healthy men. Maheshwari, U.R., *et al.* 559

DIET

Tooth wear rates among contemporary Australian aborigines. Molnar, S., *et al.* 562

DMF INDEX

Estimates of the gain in power utilizing transformations of DMFS scores. Smith, M.R., *et al.* 992

DNA

Relationships among the oral fusobacteria assessed by DNA-DNA hybridization. Potts, T.V., *et al.* 702

DOGS

Development of a novel tooth-root implant material, The. El Basty, M.A., *et al.* 7
Simplified technique for the evaluation of circulation in experimental osseous grafts, A. Petri, W.H., *et al.* 752

DRINKING WATER

Dental caries and strontium concentration in drinking water and surface enamel. Athanassouli, T.M., *et al.* 989

EDTA

Mechanism of differential staining in carious dentin. Kuboki, Y., *et al.* 713

EGTA

Dispersed rat parotid cells: role of calcium and cAMP in the regulation of amylase secretion. Quissell, D.O., *et al.* 131

ELASTICITY

Plastic deformation of orthodontic wires. Goldberg, A.J., *et al.* 1016

ELASTOMERS

Effect of processing temperature on the properties of a polyvinyl chloride maxillofacial elastomer. Yu, R., *et al.* 1098

ENDORPHINS

Plasma beta-endorphin-like immunoreactivity, pain, and anxiety following administration of placebo in oral surgery patients. Hargreaves, K.M., *et al.* 1170*

ENZYMES

Effects of androgens on the activity of steroid-metabolizing enzymes in the murine submaxillary gland. Katsukawa, H., *et al.* 725
Prevention of dental caries in hamsters by an endo-1,3-D-glucanase. Simonson, L.G., *et al.* 395
Production of histolytic enzymes by a combination of oral bacteria with known pathogenicity. Dahlén, G., *et al.* 1041

EPITHELIAL CELLS

Grooved titanium surfaces orient growth and migration of cells from human gingival explants. Brunette, D.M., *et al.* 1045
Neuraminidase-activated attachment of *actinomyces naeslundii* ATCC 12104 to human buccal epithelial cells. Saunders, J.M., *et al.* 1038

EPITHELIUM

Grooved titanium surfaces orient growth and migration of cells from human gingival explants. Brunette, D.M., *et al.* 1045

ESTRADIOL

Biosynthesis of 17β-estradiol and its binding to specific receptors in human gingiva. Vittek, J., *et al.* 341

ESTRONE

Biosynthesis of 17B-estradiol and its binding to specific receptors in human gingiva. Vittek, J., *et al.* 341

EUGENOL

Effect of eugenol on constrictor responses in blood vessels of the rabbit ear. Hume, W.R. 1013

FATTY ACIDS

Cellular fatty acid and soluble protein profiles of oral fusobacteria. Calhoon, D.A., *et al.* 1181

FIBROBLASTS

Increased accumulation of sulfated glycosaminoglycans in cultures of human fibroblasts from phenytoin-induced gingival overgrowth. Kantor, M.L., *et al.* 383

FLUORIDATION

Combined effect of trace elements and fluoride on caries: changes over ten years in northwest Ohio (U.S.A.). Curzon, M.E.J. 96

FLUORIDES

Concentration changes in surface Ca, P, F, Zn, Fe, and Sr during white spot formation. Crawford, A.W., *et al.* 964
Effect of acid-etching on caries-like lesions treated with stannous fluoride, The. Hicks, M.J., *et al.* 783
Effect of continuous fluoride gel use on plaque fluoride retention and microbial activity. Brown, L.R., *et al.* 746
Effect of dichloromethylene diphosphonate on fluoride balance in healthy men. Maheshwari, U.R., *et al.* 559
Effect of zinc citrate on fluoride uptake by artificial caries lesions. Mellberg, J.R., *et al.* 145
Fluoride concentrations in rat and human tooth pulps and their possible interference with phosphatase activities. Ericsson, Y., *et al.* 1196
Fluoride uptake and retention *in vitro* following topical fluoride applications. Wei, S.H.Y., *et al.* 830
Fluoride uptake by artificial caries lesions from fluoride dentifrices *in vivo*. Mellberg, J.R., *et al.* 540
In vitro caries-like lesion formation in F-containing tooth enamel. LeGeros, R.Z., *et al.* 138
In vitro effect of APF gel on three composite resins. Kula, K., *et al.* 846
Increases in fluoride, calcium, and phosphate in dental plaque resulting from the use of a mineralizing mouthrinse containing urea and monofluorophosphate. Pearce, E.I.F., *et al* 818
Microbiologic effects of SnF_2 and NaF mouthrinses in subjects with high caries activity: results after one year. Tinanoff, N., *et al.* 907
Microradiographic and chemical comparison of *in vitro* systems for the simulation of incipient caries in abraded bovine enamel, A. Pearce, E.I.F. 969
Shallow fluorine depth profiles of cementum in periodontal disease—a pilot study. Crawford, A.W., *et al.* 806
Sodium fluoride susceptibilities of suspected periodontopathic bacteria. Mandell, R.L. 706

FORMOCRESOLS

Biochemical study of two bifunctional reagents as alternatives to formocresol, A. Ranly, D.M., *et al.* 1054

FUCOSYLTRANSFERASES

Presence of fucosyltransferases with different substrate specificity in human parotid saliva, The. Tamagawa, H., *et al.* 811

FUSOBACTERIUM

Cellular fatty acid and soluble protein profiles of oral fusobacteria. Calhoon, D.A., *et al.* 1181
Fusobacterium periodonticum, a new species from the human oral cavity. Slots, J., *et al.* 960
Relationships among the oral fusobacteria assessed by DNA-DNA hybridization. Potts, T.V., *et al.* 702

GINGIVA

Biosynthesis of 17β-estradiol and its binding to specific receptors in human gingiva. Vittek, J., *et al.* 341
Increased accumulation of sulfated glycosaminoglycans in cultures of human fibroblasts from phenytoin-induced gingival overgrowth. Kantor, M.L., *et al.* 383
Statistical analysis of the clinical response to the single-crystal sapphire endosseous dental implant in dog jaws, A. Steflik, D.E., *et al.* 1212

GINGIVITIS

Cellular fatty acid and soluble protein profiles of oral fusobacteria. Calhoon, D.A., *et al.* 1181
Identification of a cathepsin B-like protease in the crevicular fluid of gingivitis patients. Eisenhauer, D.A., *et al.* 917
Relationships among the oral fusobacteria assessed by DNA-DNA hybridization. Potts, T.V., *et al.* 702

GLASS IONOMER CEMENTS

Cement-forming properties of phytic acid, The. Prosser, H.J., *et al.* 598
Comparison of the *in vitro* cytotoxicity of two glass-ionomer cements, A. Meryon, S.D., *et al.* 769
Effect of cement base thickness on MOD amalgam restorations. Farah, J.W., *et al.* 109

GLUCANS

Prevention of dental caries in hamsters by an endo-1,3-D-glucanase. Simonson, L.G., *et al.* 395

GLUCOCORTICOIDS

Prednisolone clearance: a possible determinant for glucocorticoid efficacy in patients with oral vesiculo-erosive diseases. Lozada, F., *et al.* 575

GLUCOSE

Effect of pH upon sucrose and glucose catabolism by the various genogroups of *streptococcus mutans*. Harper, D.S., *et al.* 526
Effect of xylitol on the growth and glycolysis of acidogenic oral bacteria. Vadeboncoeur, C., *et al.* 882
Secretion and re-absorption of glucose in rat submandibular and sublingual saliva. Takai, N., *et al.* 1022

GLUTARALDEHYDE

Biochemical study of two bifunctional reagents as alternatives to formocresol, A. Ranly, D.M., *et al.* 1054

GLYCOLYSIS

Acid sensitivity of glycolysis in normal and proton-permeable cells of *streptococcus mutans* GS-5. Thibodeau, E.A., *et al.* 1174*

GLYCOPROTEINS

Presence of fucosyltransferases with different substrate specificity in human parotid saliva, The. Tamagawa, H., *et al.* 811
Purification and some properties of neuraminidase isolated from the culture medium of oral bacterium *streptococcus mitis* ATCC 9811. Nonaka, H., *et al.* 792

GLYCOSAMINOGLYCANS

Increased accumulation of sulfated glycosaminoglycans in cultures of human fibroblasts from phenytoin-induced gingival overgrowth. Kantor, M.L., *et al.* 383

GRAFT SURVIVAL

Murine tooth organ transplantation after *in vitro* culture. Riviere, G.R., *et al.* 980

GRAMICIDINS

Acid sensitivity of glycolysis in normal and proton-permeable cells of *streptococcus mutans* GS-5. Thibodeau, E.A., *et al.* 1174*

GUANINE

Relationships among the oral fusobacteria assessed by DNA-DNA hybridization. Potts, T.V., *et al.* 702

HAMSTERS

Carbonic anhydrase in developing hamster molars. Dogterom, A.A., *et al.* 789
Prevention of dental caries in hamsters by an endo-1,3-D-glucanase. Simonsen, L.G.; *et al.* 395

HEAT

Simulation model for transient thermal analysis of restored teeth, A. de Vree, J.H.P., *et al.* 756
Structure of high-temperature oxidation zones of gold alloys for metal-porcelain bonding containing small amounts of In and Sn. Ohno, H., *et al.* 774

HEDGEHOGS

Virus-associated submandibular gland duct cell cytomegaly in a European hedgehog, *erinaceus europaeus* L. MacCallum, D.K., *et al.* 377

HEXETIDINE

Synergistic inhibitory effect of zinc and hexetidine on *in vitro* growth and acid production of *streptococcus mutans*. Moermann, J.E., *et al.* 135

HYALURONIDASE

Phase variation of hyaluronidase-producing peptostreptococci associated with periodontal disease. Tam, Y.-C., *et al.* 1009

IADR/AADR

Divisional abstracts. 401
IADR/AADR Council proceedings, 61st General Session. 1102
Study of productivity and participation at IADR and AADR annual meetings from 1970 to 1981, A. Lee, M.M., *et al.* 578

IBUPROFEN

Effect of non-steroidal anti-inflammatory drugs on the metabolism of ^{14}C-arachidonic acid by human gingival tissue, The. ElAttar, T.M.A., *et al.* 975.

IMINES

Action of drugs on liposomes with varying charges. Fujisawa, S., *et al.* 65

IMMUNOGLOBULINS, ALPHA CHAIN

Effect of prolonged stimulation of salivary flow on bacterial reactive factors, The. Kashket, S., *et al.* 331

INCISOR

Effects of an incisal bite plane on rat sublingual glands, The. Hioki, S., *et al.* 715
Effects of an incisal bite plane on rat submandibular glands, The. Abe, K., *et al.* 721
Fluoride concentrations in rat and human tooth pulps and their possible interference with phosphatase activities. Ericsson, Y., *et al.* 1196
Fluoride uptake and retention *in vitro* following topical fluoride applications. Wei, S.H.Y., *et al.* 830
Microradiographic and chemical comparison of *in vitro* systems for the simulation of incipient caries in abraded bovine enamel, A. Pearce, E.I.F. 969
Target cells for 1,25-dihydroxyvitamin D_3 in developing rat incisor teeth, Kim, Y.S., *et al.* 58

INDOMETHACIN

Effect of indomethacin on the blood flow of the rabbit submandibular gland. Fazekas, A., *et al.* 537
Effect of non-steroidal anti-inflammatory drugs on the metabolism of ^{14}C-arachidonic acid by human gingival tissue, The. ElAttar, T.M.A., *et al.* 975

IODIDES

Effect of enamel de- and remineralization on permeability to iodide and urea, The. Amdur, B.H., *et al.* 1067

ISOPROTERENOL

Quantitative changes in amylase activity in the salivary glands, pancreas, saliva, and serum after administration of isoproterenol, pilocarpine, and acetylcholine, Ikeno, T., *et al.* 56
Volume and composition of pilocarpine- and isoproterenol-simulated submandibular saliva of early postnatal rats. Martinez, J.R., *et al.* 543

JAW

Occlusal forces in normal- and long-face adults. Proffit, W.R., *et al.* 566
Occlusal forces in normal- and long-face children. Proffit, W.R., *et al.* 571
Statistical analysis of the clinical response to the single-crystal sapphire endosseous dental implant in dog jaws. A. Steflik, D.E., *et al.* 1212

KINESTHESIS

Role of oral kinesthesia in the determination of the swallowing threshold, The. Takahashi, T., *et al.* 327

LACTOBACILLUS

Effect of xylitol on the growth and glycolysis of acidogenic oral bacteria. Vadeboncoeur, C., *et al.* 882
Microbiologic effects of SnF_2 and NaF mouthrinses in subjects with high caries activity: results after one year. Tinanoff, N., *et al.* 907

LACTOPEROXIDASE

Salivary lactoperoxidase system in caries-resistant and -susceptible adults, The. Mandel, I.D., *et al.* 922

LEAD PEROXIDE

Acute tissue irritations of polysulfide rubber impression materials. Spranley, T.J., *et al.* 548

LIP

Aging and oral motor function: evidence for altered performance among older persons. Baum, B.J., *et al.* 2

LIPIDS

Action of drugs on liposomes with varying charges. Fujisawa, S., *et al.* 65
Association of lipids with proteins and glycoproteins in human saliva. Slomiany, B.L., *et al.* 24
Lipid composition of human parotid salivary gland stones. Slomiany, B.L., *et al.* 866
Lipids of supragingival calculus. Slomiany, B.L., *et al.* 862

LIPOSOMES

Action of drugs on liposomes with varying charges. Fujisawa, S., *et al.* 65

LYMPHOCYTES

Modulation of *in vitro* human lymphocyte responses by an exopolysaccharide from *capnocytophaga ochracea*. Bolton, R.W., *et al.* 1186

LYSOSOMES

Nuclear magnetic resonance spectroscopic studies of the interaction of phospholipids with stabilizing lysosome agents. Fujisawa, S., *et al.* 803

LYSOZYME

Comparative study of salivary lysozyme in caries-resistant and caries-susceptible adults, A. Stuchell, R.N., *et al.* 552

MALOCCLUSION

Enhancement of *streptococcus mutans* colonization by direct bonded orthodontic appliances. Mattingly, J.A., *et al.* 1209
Occlusal forces in normal- and long-face adults. Proffit, W.R., *et al.* 566
Occlusal forces in normal- and long-face children. Proffit, W.R., *et al.* 571

MANDIBLE

Measurement of the ability to control jaw muscle forces in man. Lewis, G.R., *et al.* 821

MANNITOL

Secretion and re-absorption of glucose in rat submandibular and sublingual saliva. Takai, N., *et al.* 1022

MASSETER MUSCLE

Cutaneous sensory thresholds from skin overlying masseter and forearm in MPD patients and controls. Davidson, R.M., *et al.* 555
Effect of short-term muscle fatigue on the masseteric silent period, The. Dale, R.A., *et al.* 349

MASTICATION

Development of an artificial oral environment for the testing of dental restoratives: bi-axial force and movement control. DeLong, R., *et al.* 32
Effect of mastication on marginal adaptation of composite restorations *in vivo*, The. Qvist, V. 904
Occlusal forces in normal- and long-face adults. Proffit, W.R., *et al.* 566
Occlusal forces in normal- and long-face children. Proffit, W.R., *et al.* 571
Role of oral kinesthesia in the determination of the swallowing threshold, The. Takahashi, T., *et al.* 327

MASTICATORY MUSCLES

Aging and oral motor function: evidence for altered performance among older persons. Baum, B.J., *et al.* 2
Cutaneous sensory thresholds from skin overlying masseter and forearm in MPD patients and controls. Davidson, R.M., *et al.* 555
Human factors in the measurement of the masseteric silent period. Lavigne, G., *et al.* 985

MAXILLA

Blood flow changes in the rabbit maxilla following an anterior osteotomy. Indresano, A.T., *et al.* 743

MAXILLOFACIAL PROSTHESES

Cigarette staining and cleaning of a maxillofacial silicone. Yu, R., *et al.* 853

Effect of processing temperature on the properties of a polyvinyl chloride maxillofacial elastomer. Yu, R., *et al.* 1098

METHACRYLATES

Extent of polymerization of dental resins by differential scanning calorimetry. Antonucci, J.M.; *et al.* 121
Nuclear magnetic resonance spectroscopic studies of the interaction of phospholipids with stabilizing lysosome agents. Fujisawa, S., *et al.* 803

METHYLMETHACRYLATES

Extent of polymerization of dental resins by differential scanning calorimetry. Antonucci, J.M., *et al.* 121
Level of residual monomer in self-curing denture base materials, The. Fletcher, A.M., *et al.* 118

MICE

Effects of androgens on the activity of steroid-metabolizing enzymes in the murine submaxillary gland. Katsukawa, H., *et al.* 725
Murine tooth organ transplantation after *in vitro* culture. Riviere, G.R., *et al.* 980
Progesterone metabolism in the murine submandibular salivary gland. Ferguson, M.M., *et al.* 1031
Ultrastructural characteristics of progenitor cell populations in the periodontal ligament. Gould, T.R.L. 873

MICROCIRCULATION

Simplified technique for the evaluation of circulation in experimental osseous grafts, A. Petri, W.H., *et al.* 752

MICROSCOPY, ELECTRON, SCANNING

Grooved titanium surfaces orient growth and migration of cells from human gingival explants. Brunette, D.M., *et al.* 1045
High-temperature behavior of a Pd-Ag alloy for porcelain. Mackert, J.R., Jr., *et al.* 1224
Microstructures of Cu-rich amalgams after corrosion. Lin, J.-H. C., *et al.* 112
Morphology of enamel surfaces treated with topical fluoride agents: SEM considerations. Nelson, D.G.A., *et al.* 1201
X-ray spectrometric technique for measuring porcelain-metal adherence, An. Ringle, R.D., *et al.* 933

MICROSCOPY, TRANSMISSION ELECTRON

In vitro caries-like lesion formation in F-containing tooth enamel. LeGeros, R.Z., *et al.* 138

MILK

Storage of experimentally avulsed teeth in milk prior to replantation. Blomlöf, L., *et al.* 912

MODELS

DENTAL

Development of an artificial oral environment for the testing of dental restoratives: bi-axial force and movement control. DeLong, R., *et al.* 32

STRUCTURAL

Dentin stresses in post-reconstructed teeth with diminishing bone support. Reinhardt, R.A., *et al.* 1002
Extensibility characteristics of the human cheek: a pilot study. Weinstein, S., *et al.* 344

THEORETICAL

Analysis of thermally-induced stresses in porcelain-metal systems. DeHoff, P.H., *et al.* 593
Biomechanical stress analysis of the amalgam-tooth interface. Peters, M.C.R.B., *et al.* 358
Effects of porcelain/alloy interfacial diffusion zones on thermo-mechanical strain. Tesk, J.A., *et al.* 585
Plastic deformation of orthodontic wires. Goldberg, A.J., *et al.* 1016
Prediction of color of an esthetic restorative material. Miyagawa, Y., *et al.* 581
Simulation model for transient thermal analysis of restored teeth, A. de Vree, J.H.P., *et al.* 756
Intraclass correlation and the application of analysis of variance to dental data. Cohen, M.E., *et al.* 322
Simulation model for quantitation of microleakage *in vitro*, A. Shen, C., *et al.* 353
Stress analysis of the human tooth using a three-dimensional finite element model. Rubin, C., *et al.* 82

MOLAR

Effect of mandibular molar anatomy on the buccal class I cavity preparation. Re, G.J., *et al.* 997
Murine tooth organ transplantation after *in vitro* culture. Riviere, G.R., *et al.* 980
Plasma beta-endorphin-like immunoreactivity, pain, and anxiety following administration of placebo in oral surgery patients. Hargreaves, K.M., *et al.* 1170*
Stress analysis of the human tooth using a three-dimensional finite element model. Rubin, C., *et al.* 82

MONKEY

Effects of composite restorations on the periodontal membrane in monkeys. Nasjleti, C.E., *et al.* 75
Initial alterations in the craniofacial complex of *macaca mulatta* skull resulting from forces with high-pull headgear, The. Kragt, G., *et al.* 388
Storage of experimentally avulsed teeth in milk prior to replantation. Blomlöf, L., *et al.* 912

MOUTHWASHES

Mechanism of action of an antiseptic, anti-odor mouthwash. Pitts, G., *et al.* 738
Microbiologic effects of SnF_2 and NaF mouthrinses in subjects with high caries activity: results after one year. Tinanoff, N., *et al.* 907
Mouthrinse which optimizes *in vivo* generation of hypothiocyanite, A. Mansson-Rahemtulla, B., *et al.* 1062

NERVE FIBERS

Ultrastructure of dentinal tubules from erupted human premolar teeth, The. Thomas, H.F., *et al.* 532

NEURAMINIDASE

Neuraminidase-activated attachment of *actinomyces naeslundii* ATCC 12104 to human buccal epithelial cells. Saunders, J.M., *et al.* 1038
Purification and some properties of neuraminidase isolated from the culture medium of oral bacterium *streptococcus mitis* ATCC 9811. Nonaka, H., *et al.* 792

NEUTROPHILS

Juvenile periodontitis as a model for neutrophil function: reduced binding of the complement chemotactic fragment, C5a. Van Dyke, T.E., *et al.* 870

ODONTOBLASTS

Extent of the odontoblast process in normal and carious human dentin. Yamada, T., *et al.* 798
Ultrastructure of dentinal tubules from erupted human premolar teeth, The. Thomas, H.F., *et al.* 532

ODONTOGENESIS

Target cells for 1,25-dihydroxyvitamin D_3 in developing rat incisor teeth. Kim, Y.S., *et al.* 58

ORTHODONTIC APPLIANCES

Enhancement of *streptococcus mutans* colonization by direct bonded orthodontic appliances. Mattingly, J.A., *et al.* 1209
Flexure modulus of elasticity of orthodontic wires, The. Goldberg, A.J., *et al.* 856
Influence of drawing parameters on the mechanical properties of two beta-titanium alloys, The. Shastry, C.V., *et al.* 1092
Initial alterations in the craniofacial complex of *macaca mulatta* skull resulting from forces with high-pull headgear, The. Kragt, G., *et al.* 388

ORTHODONTIC WIRES

Flexure modulus of elasticity of orthodontic wires, The. Goldberg, A.J., *et al.* 856
Plastic deformation of orthodontic wires. Goldberg, A.J., *et al.* 1016

ORTHODONTICS

Effects of an incisal bite plane on rat sublingual glands, The. Hioki, S., *et al.* 715
Effects of an incisal bite plane on rat submandibular glands, The. Abe, K., *et al.* 721

Role of cyclic AMP, calcium, and prostaglandins in the induction of osteoclastic bone resorption associated with experimental tooth movement, The. Yamasaki, K. 877

OSTEOCLASTS

Role of cyclic AMP, calcium, and prostaglandins in the induction of osteoclastic bone resorption associated with experimental tooth movement, The. Yamasaki, K. 877

OSTEOLYSIS

Effect of dichloromethylene diphosphonate on fluoride balance in healthy men. Maheshwari, U.R., *et al.* 559

OSTEOPOROSIS

Effect of dichloromethylene diphosphonate on fluoride balance in healthy men. Maheshwari, U.R., *et al.* 559

OSTEOTOMY

Blood flow changes in the rabbit maxilla following an anterior osteotomy. Indresano, A.T., *et al.* 743

PAIN

Plasma beta-endorphin-like immunoreactivity, pain, and anxiety following administration of placebo in oral surgery patients. Hargreaves, K.M., *et al.* 1170*

PANCREAS

Quantitative changes in amylase activity in the salivary glands, pancreas, saliva, and serum after administration of isoproterenol, pilocarpine, and acetylcholine. Ikeno, T., *et al.* 56

PARATHYROID HORMONE

Effects of parathyroid hormone, calcitonin, and vitamin D metabolites on calcium transport in the secretory rat enamel organ, The. Bawden, J.W., *et al.* 952

PEDODONTICS

Autonomic responses to dental procedures in pedodontic patients during a standard restoration session. West, G.A., *et al.* 728

Occlusal forces in normal- and long-face children. Proffit, W.R., *et al.* 571

PERFUSION

Simplified technique for the evaluation of circulation in experimental osseous grafts, A. Petri, W.H., *et al.* 752

PERIODONTAL DISEASE

Collagenase activity in human saliva. Iijima, K., *et al.* 709

Effect of non-steroidal anti-inflammatory drugs on the metabolism of ^{14}C-arachidonic acid by human gingival tissue, The. ElAttar, T.M.A., *et al.* 975

Fusobacterium periodonticum, a new species from the human oral cavity. Slots, J., *et al.* 960

Modulation of *in vitro* human lymphocyte responses by an exopolysaccharide from *capnocytophaga ochracea*. Bolton, R.W., *et al.* 1186

Shallow fluorine depth profiles of cementum in periodontal disease—a pilot study. Crawford, A.W., *et al.* 806

Sodium fluoride susceptibilities of suspected periodontopathic bacteria. Mandell, R.L. 706

PERIODONTAL LIGAMENT

Effects of an incisal bite plane on rat sublingual glands, The. Hioki, S., *et al.* 715

Effects of an incisal bite plane on rat submandibular glands, The. Abe, K., *et al.* 721

Effects of composite restorations on the periodontal membrane in monkeys. Nasjleti, C.E., *et al.* 75

Ultrastructural characteristics of progenitor cell populations in the periodontal ligament. Gould, T.R.L. 873

PERIODONTAL POCKET

Phase variation of hyaluronidase-producing peptostreptococci associated with periodontal disease. Tam, Y.-C., *et al.* 1009

PERIODONTITIS

Cellular fatty acid and soluble protein profiles of oral fusobacteria. Calhoon, D.A., *et al.* 1181

Juvenile periodontitis as a model for neutrophil function: reduced binding of the complement chemotactic fragment, C5a. Van Dyke, T.E., *et al.* 870

Production of histolytic enzymes by a combination of oral bacteria with known pathogenicity. Dahlén, G., *et al.* 1041

PHENYTOIN

Increased accumulation of sulfated glycosaminoglycans in cultures of human fibroblasts from phenytoin-induced gingival overgrowth. Kantor, M.L., *et al.* 383

PHOSPHATASES

Fluoride concentrations in rat and human tooth pulps and their possible interference with phosphatase activities. Ericsson, Y., *et al.* 1196

PHOSPHOLIPIDS

Nuclear magnetic resonance spectroscopic studies of the interaction of phospholipids with stabilizing lysosome agents. Fujisawa, S., *et al.* 803

PILOCARPINE

Quantitative changes in amylase activity in the salivary glands, pancreas, saliva, and serum after administration of isoproterenol, pilocarpine, and acetylcholine. Ikeno, T., *et al.* 56

Volume and composition of pilocarpine- and isoproterenol-stimulated submandibular saliva of early postnatal rats. Martinez, J.R., *et al.* 543

PIROXICAM

Effect of non-steroidal anti-inflammatory drugs on the metabolism of ^{14}C-arachidonic acid by human gingival tissue, The. ElAttar, T.M.A., *et al.* 975

POLYCARBOXYLATE CEMENTS

Effect of cement base thickness on MOD amalgam restorations. Farah, J.W., *et al.* 109

Rate of setting of zinc polycarboxylate dental cements investigated by an electric conductance method, The. Wiegman-Ho, L., *et al.* 105

POLYMERS

Development of a novel tooth-root implant material, The. El Basty, M.A., *et al.* 733

Post-irradiation polymerization of visible light-activated composite resin. Leung, R.L., *et al.* 363

POLYMETHYLMETHACRYLATES

Extent of polymerization of dental resins by differential scanning calorimetry. Antonucci, J.M., *et al.* 121

POLYSACCHARIDES

Effect of pH upon sucrose and glucose catabolism by the various genogroups of *streptococcus mutans*. Harper, D.S., *et al.* 526

Modulation of *in vitro* human lymphocyte responses by an exopolysaccharide from *capnocytophaga ochracea*. Bolton, R.W., *et al.* 1186

POLYVINYL CHLORIDE

Effect of processing temperature on the properties of a polyvinyl chloride maxillofacial elastomer. Yu, R., *et al.* 1098

POST AND CORE TECHNIC

Dentin stresses in post-reconstructed teeth with diminishing bone support. Reinhardt, R.A., *et al.* 1002

Stress analysis of a tooth restored with a post and core. Peters, M.C.R.B, *et al.* 760

PREDNISOLONE

Nuclear magnetic resonance spectroscopic studies of the interaction of phospholipids with stabilizing lysosome agents. Fujisawa, S., *et al.* 803

Prednisolone clearance: a possible determinant for glucocorticoid efficacy in patients with oral vesiculo-erosive diseases. Lozada, F., *et al.* 575

PREDNISONE

Prednisone clearance: a possible determinant for glucocorticoid efficacy in patients with oral vesiculo-erosive diseases. Lozada, F., *et al.* 575

PROGENITOR CELLS

Ultrastructural characteristics of progenitor cell populations in the periodontal ligament. Gould, T.R.L. 873

PROGESTERONE

Progesterone metabolism in the murine submandibular salivary gland. Ferguson, M.M., *et al.* 1031

PROSTAGLANDINS

Effect of indomethacin on the blood flow of the rabbit submandibular gland. Fazekas, Á., *et al.* 537

Effect of non-steroidal anti-inflammatory drugs on the metabolism of ^{14}C-arachidonic acid by human gingival tissue, The. ElAttar, T.M.A., *et al.* 975

PROTEINS

Cellular fatty acid and soluble protein profiles of oral fusobacteria. Calhoon, D.A., *et al.* 1181

PSEUDOCHOLINESTERASE

Pseudocholinesterase activity and its origin in human oral fluid. Ryhänen, R. *et al.* 20

RABBITS

Blood flow changes in the rabbit maxilla following an anterior osteotomy. Indresano, A.T., *et al.* 743

Effect of eugenol on constrictor responses in blood vessels of the rabbit ear. Hume, W.R. 1013

Effect of indomethacin on the blood flow of the rabbit submandibular gland. Fazekas, Á., *et al.* 537

Localization of serum albumin in dentin and enamel. Okamura, K. 100

RADIATION EFFECTS

Changes in protein composition of saliva from radiation-induced xerostomia patients and its effect on growth of oral streptococci. Cowman, R.A., *et al.* 336

RADIATION, IONIZING

Shallow fluorine depth profiles of cementum in periodontal disease—a pilot study. Crawford, A.W., *et al.* 806

RATS

Dispersed rat parotid cells: role of calcium and cAMP in the regulation of amylase secretion. Quissell, D.O., *et al.* 131

Effects of an incisal bite plane on rat sublingual glands, The. Hioki, S., *et al.* 715

Effects of an incisal bite plane on rat submandibular glands, The. Abe, K., *et al.* 721

Effects of parathyroid hormone, calcitonin, and vitamin D metabolites on calcium transport in the secretory rat enamel organ, The. Bawden, J.W., *et al.* 952

Enamel demineralization tests with some standard foods and candies. Bibby, B.G., *et al.* 885

Enzymatic sulfation of glycosphingolipids in rat parotid salivary glands. Zdebska, E., *et al.* 1026

Fluoride concentrations in rat and human tooth pulps and their possible interference with phosphatase activities. Ericsson, Y., *et al.* 1196

Oral colonization and pathogenicity of *actinomyces israelii* in gnotobiotic rats. Behbehani, M.J., *et al.* 69

Rat caries assay of reference foods and sugar-containing snacks. Navia, J.M., *et al.* 893

Role of cyclic AMP, calcium, and prostaglandins in the induction of osteoclastic bone resorption associated with experimental tooth movement, The. Yamasaki, K. 877

Secretion and re-absorption of glucose in rat submandibular and sublingual saliva. Takai, N., *et al.* 1022

Target cells for 1,25-dihydroxyvitamin D_3 in developing rat incisor teeth. Kim, Y.S., *et al.* 58

Volume and composition of pilocarpine- and isoproterenol-stimulated submandibular saliva of early postnatal rats. Martinez, J.R., *et al.* 543

RESEARCH PRODUCTIVITY

Study of productivity and participation at IADR and AADR annual meetings from 1970 to 1981, A. Lee, M.M., *et al.* 578

RUBBER

Acute tissue irritations of polysulfide rubber impression materials. Spranley, T.J., *et al.* 548

SALIVA

Acidogenic potential of reference foods and snacks at interproximal sites in the human dentition, The. Jensen, M.E., *et al.* 889

Association of lipids with proteins and glycoproteins in human saliva. Slomiany, B.L., *et al.* 24

Changes in protein composition of saliva from radiation-induced xerostomia patients and its effect on growth of oral streptococci. Cowman, R.A., *et al.* 336

Collagenase activity in human saliva. Iijima, K., *et al.* 709

Comparative growth responses of oral streptococci on mixed saliva or the separate submandibular and parotid secretions from caries-active and caries-free individuals. Cowman, R.A., *et al.* 946

Comparative study of salivary lysozyme in caries-resistant and caries-susceptible adults, A. Stuchell, R.N., *et al.* 552

Effect of indomethacin on the blood flow of the rabbit submandibular gland. Fazekas, Á., *et al.* 537

Effect of prolonged stimulation of salivary flow on bacterial reactive factors, The. Kashket, S., *et al.* 331

Effects of an incisal bite plane on rat sublingual glands, The. Hioki, S., *et al.* 715

Effects of an incisal bite plane on rat submandibular glands, The. Abe, K., *et al.* 721

Increased salivary buffering in association with a low caries experience in children suffering from cystic fibrosis. Kinirons, M.J. 815

Lipid composition of human parotid salivary gland stones. Slomiany, B.L., *et al.* 866

Lipids of supragingival calculus. Slomiany, B.L., *et al.* 862

Microbiologic effects of SnF_2 and NaF mouthrinses in subjects with high caries activity: results after one year. Tinanoff, N., *et al.* 907

Mouthrinse which optimizes *in vivo* generation of hypothiocyanite, A. Mansson-Rahemtulla, B., *et al.* 1062

Presence of fucosyltransferases with different substrate specificity in human parotid saliva, The. Tamagawa, H., *et al.* 811

Pseudocholinesterase activity and its origin in human oral fluid. Ryhänen, R., *et al.* 20

Quantitation of human salivary acidic proline-rich proteins in oral diseases. Mandel, I.D., *et al.* 943

Quantitative changes in amylase activity in the salivary glands, pancreas, saliva, and serum after administration of isoproterenol, pilocarpine, and acetylcholine. Ikeno, T., *et al.* 56

Salivary lactoperoxidase system in caries-resistant and -susceptible adults, The. Mandel, I.D., *et al.* 922

Secretion and re-absorption of glucose in rat submandibular and sublingual saliva. Takai, N., *et al.* 1022

Volume and composition of pilocarpine- and isoproterenol-stimulated submandibular saliva of early postnatal rats. Martinez, J.R., *et al.* 543

SALIVARY DUCT CALCULI

Lipid composition of human parotid salivary gland stones. Slomiany, B.L., *et al.* 866

Lipids of supragingival calculus. Slomiany, B.L., *et al.* 862

Weddellite in submandibular gland calculus. Yamamoto, H., *et al.* 16

SALIVARY GLANDS

Comparative growth responses of oral streptococci on mixed saliva or the separate submandibular and parotid secretions from caries-active and caries-free individuals. Cowman, R.A., *et al.* 946

Comparative study of salivary lysozyme in caries-resistant and caries-susceptible adults, A. Stuchell, R.N., *et al.* 552

Dispersed rat parotid cells: role of calcium and cAMP in the regulation of amylase secretion. Quissell, D.O., *et al.* 131

Effect of indomethacin on the blood flow of the rabbit submandibular gland. Fazekas, Á., *et al.* 537

Effect of prolonged stimulation of salivary flow on bacterial reactive factors, The. Kashket, S., *et al.* 331

Effects of androgens on the activity of steroid-metabolizing enzymes in the murine submaxillary gland. Katsukawa, H., *et al.* 725

Effects of an incisal bite plane on rat sublingual glands, The. Hioki, S., *et al.* 715

Effects of an incisal bite plane on rat submandibular glands, The. Abe, K., *et al.* 721

Enzymatic sulfation of glycosphingolipids in rat parotid salivary glands. Zdebska, E., *et al.* 1026

Increased salivary buffering in association with

a low caries experience in children suffering from cystic fibrosis. Kinirons, M.J. 815
Lipid composition of human parotid salivary gland stones. Slomiany, B.L., *et al.* 866
Lipids of supragingival calculus. Slomiany, B.L., *et al.* 862
Presence of fucosyltransferases with different substrate specificity in human parotid saliva, The. Tamagawa, H., *et al.* 811
Progesterone metabolism in the murine submandibular salivary gland. Ferguson, M.M., *et al.* 1031
Quantitation of human salivary acidic proline-rich proteins in oral diseases. Mandel, I.D., *et al.* 943
Quantitative changes in amylase activity in the salivary glands, pancreas, saliva, and serum after administration of isoproterenol, pilocarpine, and acetylcholine. Ikeno, T., *et al.* 56
Secretion and re-absorption of glucose in rat submandibular and sublingual saliva. Takai, N., *et al.* 1022
Virus-associated submandibular gland duct cell cytomegaly in a European hedgehog, *erinaceus europaeus* L. MacCallum, D.K., *et al.* 377
Volume and composition of pilocarpine- and isoproterenol-stimulated submandibular saliva of early postnatal rats. Martinez, J.R., *et al.* 543
Weddellite in submandibular gland calculus. Yamamoto, H., *et al.* 16

SALIVARY PROTEINS

Association of lipids with proteins and glycoproteins in human saliva. Slomiany, B.L., *et al.* 24
Changes in protein composition of saliva from radiation-induced xerostomia patients and its effect on growth of oral streptococci. Cowman, R.A., *et al.* 336
Comparative growth responses of oral streptococci on mixed saliva or the separate submandibular and parotid secretions from caries-active and caries-free individuals. Cowman, R.A., *et al.* 946
Effect of prolonged stimulation of salivary flow on bacterial reactive factors, The. Kashket, S., *et al.* 331
Effects of an incisal bite plane on rat sublingual glands, The. Hioki, S., *et al.* 715
Effects of an incisal bite plane on rat submandibular glands, The. Abe, K., *et al.* 721
Quantitation of human salivary acidic proline-rich proteins in oral diseases. Mandel, I.D., *et al.* 943
Volume and composition of pilocarpine- and isoproterenol-stimulated submandibular saliva of early postnatal rats. Martinez, J.R., *et al.* 543

SERUM ALBUMIN

Localization of serum albumin in dentin and enamel. Okamura, K. 100

SHARKS

In vitro caries-like lesion formation in F-containing tooth enamel. LeGeros, R.Z., *et al.* 138

SILICATE CEMENT

Cement-forming properties of phytic acid, The. Prosser, H.J., *et al.* 598

SILICONE ELASTOMERS

Cigarette staining and cleaning of a maxillofacial silicone. Yu, R., *et al.* 853
Water absorption and water solubility of soft lining materials for acrylic dentures. Braden, M., *et al.* 764

SKIN DISEASES

Prednisolone clearance: a possible determinant for glucocorticoid efficacy in patients with oral vesiculo-erosive diseases. Lozada, F., *et al.* 575

SKULL

Initial alterations in the craniofacial complex of *macaca mulatta* skull resulting from forces with high-pull headgear, The. Kragt, G., *et al.* 388

SOLUBILITY

Solubility of octacalcium phosphate at 37 °C in the system $Ca(OH)_2$-H_3PO_4-KNO_3-H_2O. Shyu, L.J., *et al.* 398

SPECTROMETRY, X-RAY EMISSION

Aluminum foil pouch packaging in pre-measured amalgam capsules. Rinne, V.W. 116

SPECTRUM ANALYSIS

Mechanism of adhesion of polyelectrolyte cements to hydroxyapatite. Wilson, A.D., *et al.* 590
Prediction of color of an esthetic restorative material. Miyagawa, Y., *et al.* 581

STAINS AND STAINING

Cigarette staining and cleaning of a maxillofacial silicone. Yu, R., *et al.* 853
Comparison of antimicrobial activity of four disclosant dyes, A. Baab, D.A., *et al.* 837
Mechanism of differential staining in carious dentin. Kuboki, Y., *et al.* 713

STEROIDS

Effects of androgens on the activity of steroid-metabolizing enzymes in the murine submaxillary gland. Katsukawa, H., *et al.* 725

STOMATITIS, APHTHOUS

Prednisolone clearance: a possible determinant for glucocorticoid efficacy in patients with oral vesiculo-erosive diseases. Lozada, F., *et al.* 575

STREPTOCOCCUS

Comparative growth responses of oral streptococci on mixed saliva or the separate submandibular and parotid secretions from caries-active and caries-free individuals. Cowman, R.A., *et al.* 946
Comparison of antimicrobial activity of four disclosant dyes, A. Baab, D.A., *et al.* 837
Effect of continuous fluoride gel use on plaque fluoride retention and microbial activity. Brown, L.R., *et al.* 746
Effect of pH upon sucrose and glucose catabolism by the various genogroups of *streptococcus mutans*. Harper, D.S., *et al.* 526
Effect of xylitol on the growth and glycolysis of acidogenic oral bacteria. Vadeboncoeur, C., *et al.* 882
Microbiologic effects of SnF_2 and NaF mouthrinses in subjects with high caries activity: results after one year. Tinanoff, N., *et al.* 907
Phase variation of hyaluronidase-producing peptostreptococci associated with periodontal disease. Tam, Y.-C., *et al.* 1009
Purification and some properties of neuraminidase isolated from the culture medium of oral bacterium *streptococcus mitis* ATCC 9811. Nonaka, H., *et al.* 792
Sodium fluoride susceptibilities of suspected periodontopathic bacteria. Mandell, R.L. 706
Use of bacteriophage-resistant mutants to study *actinomyces viscosus* cell surface receptors. Tylenda, C.A., *et al.* 1179*

S. MUTANS

Acid sensitivity of glycolysis in normal and proton-permeable cells of *streptococcus mutans* GS-5. Thibodeau, E.A., *et al.* 1174*
Changes in protein composition of saliva from radiation-induced xerostomia patients and its effect on growth of oral streptococci. Cowman, R.A., *et al.* 336
Detection of antigens in enzymic lysates of cell wall from *streptococcus mutans* strains. Knox, K.W., *et al.* 1033
Effect of prolonged stimulation of salivary flow on bacterial reactive factors, The. Kashket, S., *et al.* 331
Enhancement of *streptococcus mutans* colonization by direct bonded orthodontic appliances. Mattingly, J.A., *et al.* 1209
Prevention of dental caries in hamsters by an endo-1,3-D-glucanase. Simonson, L.G., *et al.* 395
Synergistic inhibitory effect of zinc and hexetidine on *in vitro* growth and acid production of *streptococcus mutans*. Moermann, J.E., *et al.* 135

S. SANGUIS

Changes in protein composition of saliva from radiation-induced xerostomia patients and its effect on growth of oral streptococci. Cowman, R.A., *et al.* 336
Effect of prolonged stimulation of salivary flow on bacterial reactive factors, The. Kashket, S., *et al.* 331

STRONTIUM

Dental caries and strontium concentration in drinking water and surface enamel. Athanassouli, T.M., *et al.* 989

SUCROSE

Effect of pH upon sucrose and glucose catabolism by the various genogroups of *streptococcus mutans*. Harper, D.S., *et al.* 526

Plaque pH measurements by different methods on the buccal and approximal surfaces of human teeth after a sucrose rinse. Jensen, M.E., *et al.* 1058

SULFATES

Enzymatic sulfation of glycosphingolipids in rat parotid salivary glands. Zdebska, E., *et al.* 1026

SULFIDES

Acute tissue irritations of polysulfide rubber impression materials. Spranley, T.J., *et al.* 548

TASTE THRESHOLD

Taste thresholds, taste preferences, and dental caries in 15-year-olds. Nilsson, B., *et al.* 1069

TELEMETRY

Acidogenic potential of reference foods and snacks at interproximal sites in the human dentition, The. Jensen, M.E., *et al.* 889

TEMPERATURE

Dentin permeability: effects of temperature on hydraulic conductance. Pashley, D.H., *et al.* 956

TEMPOROMANDIBULAR JOINT SYNDROME

Cutaneous sensory thresholds from skin overlying masseter and forearm in MPD patients and controls. Davidson, R.M., *et al.* 555

Effect of short-term muscle fatigue on the masseteric silent period, The. Dale, R.A., *et al.* 349

Human factors in the measurement of the masseteric silent period. Lavigne, G., *et al.* 985

TENSILE STRENGTH

Effects of fatigue on a soldered base metal alloy. Hawbolt, E.B., *et al.* 1221

Three-point beam test for the evaluation of dental porcelain, The. Edwards, M.R., *et al.* 1086

THIOCYANATES

Mouthrinse which optimizes *in vivo* generation of hypothiocyanite, A. Mansson-Rahemtulla, B., *et al.* 1062

TITANIUM

Grooved titanium surfaces orient growth and migration of cells from human gingival explants. Brunette, D.M., *et al.* 1045

TONGUE

Aging and oral motor function: evidence for altered performance among older persons. Baum, B.J., *et al.* 2

TOOTH

Dentin stresses in post-reconstructed teeth with diminishing bone support. Reinhardt, R.A., *et al.* 1002

Development of a novel tooth-root implant material, The. El Basty, M.A., *et al.* 733

Extent of the odontoblast process in normal and carious human dentin. Yamada, T., *et al.* 798

Murine tooth organ transplantation after *in vitro* culture. Riviere, G.R., *et al.* 980

Occlusal forces in normal- and long-face adults. Proffit, W.R., *et al.* 566

Occlusal forces in normal- and long-face children. Proffit, W.R., *et al.* 571

Plaque pH measurements by different methods on the buccal and approximal surfaces of human teeth after a sucrose rinse. Jensen, M.E., *et al.* 1058

Simulation model for transient thermal analysis of restored teeth, A. de Vree, J.H.P., *et al.* 756

Stress analysis of a tooth restored with a post and core. Peters, M.C.R.B., *et al.* 760

Stress analysis of the human tooth using a three-dimensional finite element model. Rubin, C., *et al.* 82

Tooth wear rates among contemporary Australian aborigines. Molnar, S., *et al.* 562

Ultrastructure of dentinal tubules from erupted human premolar teeth, The. Thomas, H.F., *et al.* 532

TOOTH ABRASION

Tooth wear rates among contemporary Australian aborigines. Molnar, S., *et al.* 562

TOOTH, ARTIFICIAL

Stress analysis of the human tooth using a three-dimensional finite element model. Rubin, C., *et al.* 82

TOOTH CALCIFICATION

Carbonic anhydrase in developing hamster molars. Dogterom, A.A., *et al.* 789

Characterization and modification of electrochemical properties of teeth. Tung, M.S., *et al.* 60

Concentration changes in surface Ca, P, F, Zn, Fe, and Sr during white spot formation. Crawford, A.W., *et al.* 964

Effect of enamel de- and remineralization on permeability to iodide and urea, The. Amdur, B.H., *et al.* 1067

Effects of parathyroid hormone, calcitonin, and vitamin D metabolites on calcium transport in the secretory rat enamel organ, The. Bawden, J.W., *et al.* 952

Increases in fluoride, calcium, and phosphate in dental plaque resulting from the use of a mineralizing mouthrinse containing urea and monofluorophosphate. Pearce, E.I.F., *et al.* 818

Localization of serum albumin in dentin and enamel. Okamura, K. 100

Mechanism of differential staining in carious dentin. Kuboki, Y., *et al.* 713

Microbeam x-ray diffraction analysis of dental calculus. Kani, T., *et al.* 92

TOOTH MOVEMENT

Role of cyclic AMP, calcium, and prostaglandins in the induction of osteoclastic bone resorption associated with experimental tooth movement, The. Yamasaki, K. 877

TOOTH REPLANTATION

Effects of composite restorations on the periodontal membrane in monkeys. Nasjleti, C.E., *et al.* 75

Storage of experimentally avulsed teeth in milk prior to replantation. Blomlöf, L., *et al.* 912

TOOTH ROOT

Development of a novel tooth-root implant material, The. El Basty, M.A., *et al.* 733

Validity of clinical assessments related to the cemento-enamel junction. Hug, H.U. 825

TRACE ELEMENTS

Combined effect of trace elements and fluoride on caries: changes over ten years in northwest Ohio (U.S.A.). Curzon, M.E.J. 96

TRANSDUCERS

Measurement of the ability to control jaw muscle forces in man. Lewis, G.R., *et al.* 821

Occlusal forces in normal- and long-face adults. Proffit, W.R., *et al.* 566

Occlusal forces in normal- and long-face children. Proffit, W.R., *et al.* 571

UREA

Effect of enamel de- and remineralization on permeability to iodide and urea, The. Amdur, B.H., *et al.* 1067

VANILLIC ACID

Development of high-strength, acrylic resin-compatible adhesive cements. Brauer, G.M., *et al.* 366

VISCOSITY

Dentin permeability; effects of temperature on hydraulic conductance. Pashley, D.H., *et al.* 956

VITAMIN D

Effects of parathyroid hormone, calcitonin, and vitamin D metabolites on calcium transport in the secretory rat enamel organ, The. Bawden, J.W., *et al.* 952

Target cells for 1,25-dihydroxyvitamin D_3 in developing rat incisor teeth. Kim, Y.S., *et al.* 58

WATER ABSORPTION

Water absorption and water solubility of soft lining materials for acrylic dentures. Braden, M., *et al.* 764

WHITLOCKITE

Composition of recrystallized bone mineral, The. Biltz, R.M., *et al.* 1190

XEROSTOMIA

Changes in protein composition of saliva from radiation-induced xerostomia patients and its effect on growth of oral streptococci. Cowman, R.A., *et al.* 336

Effect of continuous fluoride gel use on plaque fluoride retention and microbial activity. Brown, L.R., *et al.* 746

X-RAY DIFFRACTION

Aluminum foil pouch packaging in pre-measured amalgam capsules. Rinne, V.W. 116

In vitro caries-like lesion formation in F-containing tooth enamel. LeGeros, R.Z., *et al.* 138

Microbeam x-ray diffraction analysis of dental calculus. Kani, T., *et al.* 92

X-RAYS

Concentration changes in surface Ca, P, F, Zn, Fe, and Sr during white spot formation. Crawford, A.W., *et al.* 964

XYLITOL

Effect of xylitol on the growth and glycolysis of acidogenic oral bacteria. Vadeboncoeur, C., *et al.* 882

ZINC

Synergistic inhibitory effect of zinc and hexetidine on *in vitro* growth and acid production of *streptococcus mutans*. Moermann, J.E., *et al.* 135

ZINC CITRATE

Effect of zinc citrate on fluoride uptake by artificial caries lesions. Mellberg, J.R., *et al.* 145

ZINC OXIDE-EUGENOL CEMENT

Cement-forming properties of phytic acid, The. Prosser, H.J., *et al.* 598

Development of high-strength, acrylic resin-compatible adhesive cements. Brauer, G.M., *et al.* 366

Effect of cement base thickness on MOD amalgam restorations. Farah, J.W., *et al.* 109

Rate of setting of zinc polycarboxylate dental cements investigated by an electric conductance method, The. Wiegman-Ho, L., *et al.* 105

ZINC PHOSPHATE CEMENTS

Effect of cement base thickness on MOD amalgam restorations. Farah, J.W., *et al.* 109

Stress analysis of a tooth restored with a post and core. Peters, M.C.R.B., *et al.* 760

The 1983 index was prepared by The Write Words, Inc., Arlington, Virginia 22206-0446.

AUTHOR INDEX TO VOLUME 62, 1983

Explanation of symbols:

All numbers are page numbers.
An asterisk (*) after a name indicates a winner in the 27th Annual Hatton Awards Competition.
